

Wireless Remote Control

2.4GHz technology eliminates interference and saves power

COMEUP
Work Tough, Play Tough

COMEUP wireless remote control communicates by a 2.4GHz digital transmission frequency. It delivers a reliable connection covering up to 27m radius without interference. Users will experience virtually no interference and no time-lag operation when multiple devices are used in the same working area. The two-way communications provides feedback on signal receiving and it requires no manual configuration. It's easy to install. By simple plug-and-play, it starts working within seconds. Each pairing transmitter links up and stays linked automatically. You never have to worry about anyone having the same frequency. The sooner they are installed, the faster they work.

COMPARISON CHART

Item	RF-24A	RF-24B	RF-24C	RF-24D	WA-0823	WA-0824	X Brand
PN	880609	880608	881262	881286	881168	881170	
Application	DC WINCH	ATV	DC WINCH	Cub	Seal 9.5rs (built-in)	Seal 9.5rsi (built-in)	
Quick Connector	3 pin	Terminal	6 pin	Waterproof Terminal	6 pin	6 pin	
Input Voltage	8-24V (26V also available)						8-26V
Frequency	★ 2.4 GHz						433 MHz
Signal	★ Digital signal						Analog signal
Signal Receiving	★ Two ways, including feedback function						One way
Time Receiving	★ Synchronous w/o lag						0.4 sec. lag
Interference	★ Never in-band interference						Have in-band interference
Waterproof Grade	★ IP 66						
Certificate	FCC 、 CE						FCC 、 CE
Pushing Button	3 buttons						2 buttons
Starting	Press power button for 5 seconds						Press both cable in and out buttons simultaneously for 5 seconds
Remote Range	15 - 27 m						15 - 27 m
Battery	3V Lithium battery x 1						12V Alkaline batteries x 2
Applicable Area	Worldwide (Including America, Europe, Asia, Australia, Africa)						Europe: 433/868 MHz Asia: 315/433 MHz Australia: 433/915 MHz

Functions

1. Green LED for power on
2. Red LED for winching
3. Blinking green LED for low battery life
4. Blinking red LED for poor signal received

Besides the function mentioned left-hand, including warning signal for motor over-heating and signal receiving confirmation

Power on and off indicators only

FEATURES

- Works with any 12 or 24 volt solenoid-switched ATV/UTV and automotive winches.
- 2.4 GHz wireless technology works within 27m range and the anti-interference function lets you move around an obstacle for winching.
- Stylish and ergonomic design fits comfortably in your hand.
- Switch power on after a 5-second continuous press on the button for safety work.
- Automatically power off after a 5-minute silence for safety work and for conserving battery life.
- The transmitter can be self-coded, simplifying installation and replacement.

Wiring harness with built-in antenna designed for quick installation and easy wireless operation

IP66 waterproof transmitter and receiver ensure all weather protection

2.4 GHz high frequency device features never in-band interference within 27m range

Colour LED indicates different winching conditions
